
Telecom Sales, Infrastructure Program Manager

SALES | FIELD ANALYSIS | QUALITY MANAGEMENT | STRATEGIC PLANNING

Results-focused Sales Executive and Program Manager combining a strong background in client management, quality control, estimations, maintenance and planning to drive solutions on Telecom Infrastructure, Central Office Equipment and Network Deployment projects. Serves as onsite or offsite manager interpreting real-time site data and adjusting job scope depending on changing field conditions. Accomplished in working with operators, vendors and service providers on multi-million-dollar projects. Credited with strong ability to identify trends, develop competitive strategies and execute strategically planned projects. Extensive background taking projects from “Concept to Launch” within a multi-regional scope. Superior writing, presentation and soft skills.

Areas of Expertise

- | | | |

| • Digital Signage Systems | • Field Surveys & RFPs | • Vendor Management |
| | • Building Technologies | • QA Improvements |

Key Accomplishments

- Secured accounts such as Boeing, Northrop Grumman and Random House while consulting on structured cabling, wireless, security systems and medical monitoring solution projects at National Network Services, Inc.
- Aligned installation operations (network, test, turn-up) within budgets by tracking expenses to monitor deviations from targets, providing strategic direction to construction vendors/site surveyors and deploying tactical rollouts across 7 states concurrently at Federal Communications Group and ACS Dataline.
- Stretched costs by determining the best usage of resources to support requirements within budgetary restrictions while managing 6 project managers and over 75 technical personnel for the largest structured cabling and information technology services provider in Arizona (LAN, WAN systems, and PBX's).
- Co-founded FCCI, a communications contractor providing outside/inside plant cabling and complete voice/data installation and design services to clients such as Bank of America-Arizona, a 25 million-dollar valued contract.
- Served as technical consultant: designing, installing and maintaining Digital Signage system across multiple campuses/facilities.

Professional Experience

Elite Media Group, Inc., Colorado Springs, CO
COO, VP / Social Media Video Producer 2009 – Present

Achieve communication and video production initiatives for the health industry by creating 1k and 4k video/media broadcast ad products that attract interest, educate and engage users. Increase competitive positioning by successfully integrating a range of equipment (4K Drone, large crane, 3-axis gimbal, high end DSLR'S, HD-P2 cameras and POV cameras) and post gear (MacOS and WinOS based, FCPX and Adobe CC). Co-write customer/reader focused scripts/content to optimize results. Managed multiple production crews in activities such as recording, editing and producing media.

- Allocate resources across projects by managing studio facilities design, procurement, maintenance and upgrades for all production and post-production equipment.
- Improve current products and roll-out new products by closely collaborating with departments (IT, Technical Support, Development, Marketing & Sales) to gather requirements and create media reflective of their vision.
- Manage the scope of media planning with clear roadmaps to deliver results within timelines while screening, proposing and developing briefs and project initiatives to stakeholders/managers.

continued...

- Expand reach by preparing media for multi-channel campaigns combined with innovative content plans, social media experiences and infographics designed to generate awareness, engagement and leads.
- Design, install, maintain and manage content programming for Digital Signage system across 7 campuses/facilities for largest behavioral health system in southern Colorado.
- Plan, install and troubleshoot public event A/V presentations and live event operation and management.
- Boost creative work quality using QA testing and analytic tools to track milestones and monitor deviations from targets, resulting in proactively readjusting content and communication strategies accordingly.

Redhawk (a United Technologies Company), Colorado Springs, CO

Service Manager & Project Manager, 2007 - 2009

Installed 535 WAP (Wireless Access Points) for Colorado College in under 45 days with temp labor, resulting in a promotion to Service Manager, managing the operational delivery of all projects as well as the administration of staff (12 FTE and 20 Temps). Reported to the corporate office in Denver. Clients include School District 11, Widefield School District 3, Colorado College, University of Colorado, Colorado Springs, Pueblo Community College, Trinidad Community College, Centura Health Systems, Barclays Bank, and Colorado Department of Corrections.

- Spearheaded completion of construction projects on time and within \$1,000,000 budgets by managing the RFQ/RFP process, selecting competitive vendors and streamlining scheduling/roll-out activities.
- Delivered efficiency and maintained industry competitiveness by defining technical project plans and roadmaps to achieving production goals through accurate estimations, site surveys, proposals, blueprints and specifications.
- Improved delivery by identifying roadblocks and designing solutions while managing projects, successfully readjusting accordingly based on construction investigations and on-site progress evaluations.
- Maximized results by working directly with client project management, operations personnel, engineers and field teams to resolve issues.
- Served as an information resource and technical expert liaison; reading construction drawings, making corrections as needed (red line) and preparing schedule expectations to ensure clear delivery.
- Minimized costs by cross-referencing data in weekly cost reports to ensure accuracy in preparing bills of material and processing payments for contractors and 3rd party vendors.
