woods.jeff40@gmail.com

Profile: Motivated, personable, construction project management professional with tremendous leadership skills and experience in multiple disciplines. Background includes a proven ability to control the detailed planning and deployment of large construction projects. Concentrated efforts include business cost controls and field installation progress. I consider myself a poised and competent manager that establishes a dead-line driven project team environment. I have demonstrated the ability to transcend cultural differences and am able to travel to secure complex deployments that require leadership consistency.
