SUMMARY:

A manager/director of IT and wireless telecom network engineering and operations, a project/program manager and network (RAN/LAN/WAN/MAN) engineer with 15+ years of global success; responsible for IT and telecom infrastructure, data center builds & migrations, HW/SW upgrades, site mods and the management of technology initiatives, programs and personnel. A highly skilled leader in managing cross-company, diverse, matrixed teams of top-level staff and contract engineers, admins & vendors.

EXPERIENCE:

IRVINE TECHNOLOGY CORP / ATOS NORTH AMERICA, Santa Ana, CA

08/2017 – Present: Network Operations Manager, Orange County Government

Leading a team of 20+ network engineers, responsible for operation and performance of WAN, MAN, LAN and WLAN infrastructure supporting 15 Orange County agencies and 20K nodes across 150 County government sites and Tier 3 data center. Specific areas of responsibility include:

- Direct and manage a team of 20 network engineers, incl. scheduling, training, evaluations, and disciplinary actions.
- Lead the support of projects, engineering and 24/7 operations of the County of Orange data and voice networks.
- Oversee QC, operational readiness testing and turn-up of all transformed network sites.
- Responsible for SLA contract adherence and reporting to executive leadership.
- CR, Program Management and P1/P2 incident escalations manager
- Report on aggregate and individual WO/Incident KPIs
- Weekly Change Control reviews and Change Control Board representation
- Member of Governance and Network Architecture review boards
- Own and optimize operational process improvements within an ITIL framework

TDD NETWORKS, INC., Cathedral City, CA

11/2011 – Present: Owner/Operator, Independent Contractor; IT & Telecom Management, Project/Program Management and Consulting. Representative roles include:

- **As Director of Network Engineering and Operations (contract) for Craig Wireless Systems (Rancho Mirage, CA):**
 - Operational & P&L responsibility for global telecom/IT network infrastructure, including 5 Tier-3 data centers on 4 continents, RAN, LAN, WLAN, MAN, WAN, DMZ, and Internet/IP transit connected by routers, switches, firewalls, traffic shapers, cell sites, servers, microwave and fiber/dark fiber backhaul, etc.
 - Defined and presented IT/Telecom infrastructure projects to executive teams, managed full lifecycle of market networks using project and site construction tracking tools, building data centers, cell sites, and ISP/OSP transport networks while maintaining timelines and budgets through effective leadership and management of PMs, field crews, vendors and support staff.
 - Directed staff of 20+ PMs, engineers, admins, and contractors in the US, Greece, New Zealand and Cambodia
- **As Program/Project Manager (contract) for Craig Wireless Systems (Rancho Mirage, CA):**
 - Deployment and successful commercial build and launch of **Craig4G**, a 4G, wireless ISP business serving California's Coachella Valley; Data Center/Core build, remote site location builds: planning, network design, path loss studies, site acquisition, zoning and permitting; site development, management of vendors, staff and construction crews, fiber & microwave ISP/OSP systems design, planning and deployment; hands-on integration of sites with existing corporate network infrastructure; commissioning, operational and network readiness testing, establishment of SLA and KPI monitoring & reporting tools and processes.
 - Developed corporate security policies, led system audits, developed DR/business continuity plans and documentation, set standards, documented best practices and ensured corporate adherence to internal and external security policies.
- **As Project Manager (contract) for Craig Wireless Hellas (Athens, Greece):**
 - Led planning and commercial deployment of PtMP, 3.5GHz RAD systems, including data center move, transport network builds and core infrastructure upgrades providing commercial wireless internet services across the cities of Athens and Thessaloniki.
- **As Program/Project Manager (contract) for Woosh Telecom (Auckland, New Zealand):**
 - Served as Program/Project Manager for nationwide 4G, commercial LTE-TD build & technology replacement/upgrade (core, fiber/microwave WAN and 130-site 3G WCDMA RAN) and multiple technical trials in New Zealand for **Woosh Telecom**.
- **As Project Manager (contract) for Nine Networks (Phnom Penh, Cambodia):**
 - Project Manager for 2.3 and 2.5 GHz WiMax sites and core network build with commercial service in Phnom Penh, Cambodia.

NOKIA SIEMENS NETWORKS, Redmond, WA USA

4/2011 thru 10/2011: Western Region Lead, Clearwire-USA Account Team

- Responsible for market network operations availability/health/performance and reporting of Clearwire Corporation's regional data centers and cell sites in Seattle, Los Angeles, and Bellingham supporting these and other commercial market network builds (additionally including Portland, Las Vegas, Boise, Eugene, and Salem.)
- Directed 2 Systems Engineers, providing site-build support, infrastructure systems integration assistance and Tier 3 troubleshooting/diagnostic support across West coast markets.
- Clearwire Account Project Manager for multiple nationwide software/system upgrades.

MOTOROLA SOLUTIONS, INC., Redmond, WA USA and Zaventem, Belgium

8/2006 thru 4/2011: Technical Market Program Manager / Program Manager

- **As Motorola/Clearwire-USA Account Team Technical Market Program Manager (Redmond, WA):**
 - Led national Issues Management & Resolution teams and root cause analysis & reporting re Motorola's core/infrastructure HW & SW across all Clearwire-USA markets, acting as primary liaison between Clearwire-Kirkland (HQ) and Motorola Account Team, Product Development, CNRC, Management groups and other vendors.
 - As Motorola's onsite (Kirkland, WA) Account Team PM, supported lab testing trials and subsequent commercial field launches of WiMAX 2.5 SP1.2b and 3.0 SW platforms into Clearwire data centers, sites and markets nationwide.
- **As Motorola Market Program Manager, Clearwire-Europe Account Team (Zaventem, Belgium):**
 - Managed all Motorola/Clearwire-Europe accounts serving as single technical point-of-contact in support of Clearwire Corp's affiliated markets in Belgium, Ireland, Spain, Denmark, Germany, Poland, Romania and Field Ops headquarters in Austria.
 - Provided field support of Expedience & PTP product lines for commercial launches in Seville, Spain and Ghent, Belgium.
 - Provided WiMax systems planning/support and project management for planned nationwide network build in Germany.
 - Coordinated and led network deployment and integration training for Expedience (PtMP) and Orthogon (PtP microwave backhaul) product lines for Clearwire engineers in Belgium, Romania and Poland.
 - Awarded Motorola's 2008 *General Manager Recognition Award for Outstanding Achievement*.

NEXTNET WIRELESS, INC., Minneapolis, MN

5/2002 thru 8/2006: Program Manager / Project Manager / Systems Engineer

- **As NextNet-Europe Program Manager (Brussels, Belgium):**
 - Directed and led Pre/Post-sale Expedience field engineering, cell site construction, upgrades and troubleshooting support for emerging Clearwire-Affiliate markets in Belgium, Ireland, Denmark and Spain.
- **As NextNet-China Program Manager (Tianjin, China):**
 - Hired, trained and directed a staff of fourteen Field Engineers in RAN design, site construction, configuration, back-end LAN/WAN network integration and operation of Expedience WiBB data networks.
 - Led all technical initiatives in the company's effort to secure 3.4 GHz, NLOS wireless product acceptance and licensing in a new market. Coordinated technical preparation of product homologation/licensing/commercial certificate testing with governmental agencies (NRRD / SRRC) of the Peoples Republic of China.
 - Initiated and led concurrent technical product-trials, building a demonstration network of 25 cell-sites for telecom-carriers in three separate provinces across China including China Telecom (Tianjin), China Unicom (Guangzhou) and Fujian Unicom (Xiamen).
- **As NextNet-Mexico Program Manager (Mexico City, Mexico) and as NextNet Project Manager (Mpls, USA):**
 - Program/Project management, site construction and systems engineering in multiple commercial launches and product trials of 2.5, 3.4, 3.5 and 3.7 GHz wireless broadband networks.
 - Initiated and led rail/light rail mobile product testing and customer demonstrations worldwide.
 - Led public safety trials/demonstrations for police and military applications.
 - Customers, deployment-project locations and project roles included:
 - **MVS Comunicaciones; México City, México, (Commercial Launch, Program Manager)**
 - **PlanetComm / Royal Thai Army; Bangkok, Thailand, (Trial, Project Manager)**
 - **Dishnet Wireless; Chennai, India, (Trial, Project Manager)**
 - **Atlantic Telenetwork; St. Thomas, US Virgin Islands, (Commercial Launch, Project Manager)**
 - **EuTel; Oranjestad, Sint Eustatius, Netherlands Antilles, (Commercial Launch, Project Manager)**
 - **Aló Comunicaciones / Banda Ancha, S.A.; Madrid, Spain, (Trial, Project Manager)**
 - **Telecom Italia / L'Arma dei Carabinieri; Rome, Italy, (Trial, Project Manager)**
- **As NextNet Systems Engineer:**
 - Led Network/Systems team for NextNet in head-to-head, multi-vendor product trials and commercial deployments across 4 continents.
 - Led first-in-the-world demonstrations of true wireless mobile Internet / Video Conferencing using 2.5 GHz product.
 - Provided post-sale customer support including training, back-end integration, backhaul and system optimization.

ALLINA HEALTH SYSTEM, INC.; Minneapolis, MN USA

2/96-5/02: Senior Network Engineer / Project Manager-Site Coordinator

➤ As Allina Senior Network Engineer:

- Directed more than a dozen hospital network build projects and cutovers, managing 5 Regional Sites-Coordination, 7 Network Engineers/Technicians and multiple business partners, contractors & vendors.
- Developed, managed and maintained a high-availability, fault-tolerant enterprise LAN/WAN network supporting 20,000 healthcare workers across 12 hospitals (~2500 total beds), 75 clinics, business/billing centers, remote data center and other facilities located in three US states while ensuring compliance with HIPAA efficiency, privacy and security mandates.
- Configured, provisioned, monitored and maintained an OC-48 (15 ATM OC3 sites), 100+ Frame Relay and Point-to-Point T1s, 125+ Cisco Routers, 400+ Cisco Switches and Bay/Nortel Hubs.

➤ As Allina Project Manager-Site Coordinator:

- Coordinated and oversaw all network projects & maintenance activities as Allina's Network Dept. liaison for its two flagship hospitals (Abbott Northwestern & St. Francis; 725+ combined beds) as well as 13 regional clinics.
- Managed a staff of 3 network technicians, a dozen contract employees, & multiple vendors.
- Planned, initiated and executed 9-month ***ANW Infrastructure Project***, replacing/migrating from legacy mainframe SNA/3270 & AS/400 systems while rebuilding a 2,400-node LAN & WAN with zero adverse-impact to critical patient care systems.
- Configured, managed and maintained 75 Bay/Nortel hubs at Abbott Northwestern and 14 other Allina facilities.

METROCOMM, INC.; Minneapolis, MN USA

5/94-2/96: Project Manager

- Led technical project teams in the installation and configuration of LAN/WAN hardware, software & cabling.
- Supervised and trained Network Installation teams.
- Milestone projects included:
 - **Kenya Power and Lighting; Stima Plaza Building, Nairobi, Kenya:** Trained 3 Network Engineers for Insight Technologies, LTD. (Nairobi) in 3Com SuperStack & CoreBuilder switch config and fiber optic termination while designing, building and debugging a 750 node LAN/WAN for the new headquarters of KPL, the national power utility of Kenya.
 - **Regina Hospital; Hastings, MN USA:** voice/data network. Supervised five project technicians in the construction, test, certification and cutover of a 500-node voice/data network in this 120-bed hospital.

CABLETRON SYSTEMS, INC.; Rochester, NH USA

1/87-6/90: Network Services Manager / Project Manager

➤ As Cabletron Network Services Regional Manager; Rolling Meadows, Illinois USA:

- Modeled the business unit's expenditure and operational plan, managed expenses and progress against the plan, coordinated and directed the activities of six Project Managers building enterprise networks for clients that included Sun Microsystems, Kodak, Bell Atlantic, Citibank, Motorola and many others..
- Prepared department budget, hired, trained and evaluated the performance of Project Management staff.
- Directed the installation of Cabletron network hardware and software in data centers across seven Midwest-U.S. states.
- Prepared/submitted proposals in response to technical RFPs, engineered network systems & led pre-sale technical presentations.
 - **As Cabletron Project Manager; Rochester, New Hampshire USA:**
- Managed and performed installations and configuration of Cabletron network hardware/software at more than 100 customer sites throughout the U.S. and Canada providing direct customer support and oversight of union/contract labor.
- Engineered and managed installation of LAN/WAN for Sanwa BGK, a Manhattan bond trading floor.
- Designed and managed installation of new Cabletron world headquarters corporate LAN/WAN.

EDUCATION, CERTIFICATIONS and TECHNICAL TRAINING:

- **B.A., Information Technology in Management; 5/12/2001; Concordia University, St. Paul, MN**
- **PMI Project Management Professional (PMP #429026); 9/08/2006; Mechelen, Belgium**
- **Technical Training Certificates;**
 - **Nokia Siemens Networks, Motorola, Cisco Systems, Nortel/Bay Networks, Fujitsu (SONET), Network Associates (Sniffer), Cabletron Systems**

SKILLS/COMPETENCIES:

- Routed / Routing Protocols:
 - TCP/IP, IPX, UDP, SMTP, SNMP, SIP, VoIP, ICMP, ARP, SSH, Telnet, RDP, S/FTP, TFTP, HTTP, etc.
 - BGP, OSPF, EIGRP, RIP, MPLS, DNS, DHCP, HSRP, VRRP, NTP, LDAP, Frame Relay, ISDN, etc.
- Hardware/SW:
 - Network: Cisco, Juniper, Ericsson/Redback, Foundry/Brocade, Motorola/Emerson, Allot, Vyatta, Mikrotik, Nomadix, etc.
 - Mux/NID: Adva, Ciena, Fujitsu, Kentrox, Canoga Perkins, etc.
 - Microwave: Dragonwave, Ubiquiti, Cambium-Motorola-Orthogon etc.
- Operating Systems, Platforms, Applications & Tools:
 - Win 7, 8, Win Server 2008/2012
 - SAN / NAS
 - VoIP/PBX: Cisco, Asterisk, Elastix
 - Email: Exchange, Axigen, Gmail Admin
 - Productivity: MS Office Suite, MS Project, Visio, ServiceNow, Remedy, Redmine, etc.
 - Tools: SevOne, NetMRI, AppNetA/Pathview, Infoblox, OpManager/ManageEngine, Netflow, Nagios, MRTG, Splunk, SolarWinds, NetPerf, Nmap, WireShark, etc.
 - Proficient with a wide variety of wired and wireless environment test equipment including oscilloscopes, spectrum analyzers, BERT testers; Rohde & Schwarz, Anritsu, Tektronix, etc.
 - Proficient with a variety of cell site construction project tracking tools including Clearvision.
- Other:
 - PMI/PMBOK Best Practices
 - SDLC - Systems Development Lifecycle
 - PMLC - Project Management Life Cycle
 - ITSM and ITIL Processes

SUMMARY of MANAGEMENT SKILLS UTILIZED ACROSS ALL ROLES:

A well-traveled, formally trained and highly experienced network engineering/ops manager/director. project and program manager, I have led domestic and international departments, programs & projects with budgets ranging from <\$50K – \$25 Million + and have demonstrated success and expertise with the following:

Strategic & Project Planning
Budget Modeling, Forecasting and Management
Risk Management
Executive & Team Presentation
Professional Communication
Resource Allocation
Relationship / Team Building
Cultural Awareness
Team Motivation
Vendor Management
Conflict Resolution
Project Documentation
Scope Management
Technical and Project Tools Proficiencies
Macro Perspective, Effective Tactical Leadership from Search Ring through Operational Readiness Testing & Turn-up
Methodological Approach
Process Improvement
