

Ujwala P

Mobile: +1(408)-913-3338 | Email: ujwalar08@gmail.com

OBJECTIVE:

- To excel as a RF engineer in the field of Telecommunications. I wish to add value to the position I am hired through my skill set and establish myself as an asset to the organization.

SUMMARY:

- Sound knowledge in latest techniques in RF Engineering and Cellular Industry, Propagation Modeling, Antenna theory, Wireless Communication principles. Experience and expertise in LTE, CDMA, GSM, UMTS technologies.

TECHNICAL PROFICIENCY:

- Tools - ACTIX Analyzer, ASSET, RFDS, ATOLL, MapInfo Professional, MATLAB, H Spice, Model Sim, Synopsys, Wind Catcher, Cadence, Xilinx.
- Applications - MS Excel, MS PowerPoint, Photoshop, Visual Studio 2008.
- Operating systems - Windows 2000/NT/XP, Mac, Linux, Unix.
- Programming languages - Verilog, C, Perl, TCL.

EDUCATION:

- Master's degree in Electrical Engineering, University of Southern California 2015-2016
- Bachelor of Technology in Electronics and Communication Eng., GNITS, India 2010-2014.

Relevant Course Work:

- Cellular & Mobile Communications, Radar Systems, Antennas & Wave Propagation, Microwave Engineering.

WORK EXPERIENCE:

RF Engineer, Realm IT services LLC

Feb'17-Present

- Responsible for redesigning 450 RFDSs for LTE 1900/2100/700/600 and preparing the integration files to conform to the respective specifications.
- Creates LTE Neighbors scripts and loaded them into OSS.
- Update ASSET (propagation tool) for new sites and various E911 related databases.
- Creates Justification packages using map Info to justify new sites.
- Perform coverage optimization for single site and the cluster by altering antenna up/down-tilts or azimuths to ensure better coverage around sites.
- Working on Site sector verification files, Antenna & Fiber Port matrix, Site Commissioning files based on the assigned configurations for the corresponding sites.
- Perform neighbor optimization activities for network performance improvement.
- Working with different groups such as Network design, Deployment, Site Acquisitions and Development teams within the Scope of Work.
- Working on customer tickets resolution and assist Senior RF Engineers for network issues and optimization.

RF Design Engineer, Packet Path LLC

Sep'16-Dec'16

- Responsible for creating 250 RF Data sheets for LTE.
- Then perform E911 verification using ATOLL tool by building all the nodes as per the RFDS.
- Reviewed Site configuration and planned antenna position, direction, tilt etc.
- Worked on RF Performance of 400 LTE sites with good knowledge of RSCP, RSRP, RSSI, Ec/No and other parameters related to RF.
- Tracked project status and schedule, generate status reports, and track submission of deliverables.
- Improving LTE and UMTS KPI like CDR, CFR and analyzing coverage issues.
- Analyzed coverage plots to identify coverage holes and create search rings.
- Created PDF reports of different markets for network optimization.
- Worked with engineers and team members to develop and track requirements traceability.

RF Engineer, Bharat Sanchar Nigam Limited, India

May'14-Dec'14

- Worked in 'Telecom Technologies' at the Regional Telecom Training center, Hyderabad.
- Provided an overview on telecommunication technologies. It includes a visit to RF Planning/Mobile Towers/Telephone exchange and exposure to different systems in LAB's.
- Analyzes DT data, identified Sector-Swap, pin-pointed Pilot-Pollution / Overshooting cell, Footprint of a Sector, implementing physical changes (Tilt, azimuth, antenna).
- Exposed to the fundamentals of the telephone system and the traits of the network that BSNL provides and the advantages of BSNL over other telecom service provider, the add-on facilities of BSNL.
