

JAS SHETH

3588 John F. Kennedy Blvd, Jersey City, NJ 07307

347-806-1958 | jrs882@nyu.edu

Education

New York University | Tandon School of Engineering, Brooklyn, NY

May 2017

Masters of Science in Electrical Engineering, GPA:3.267/4.0

Relevant Coursework: RF and Microwave Engineering, Electromagnetic Theory and Applications, Digital Signal Processing, Internet Architecture and Protocol, Power Systems and Economic Planning.

VJTI, University of Mumbai, India

May 2015

Bachelor of Technology, Electronics Engineering GPA: 3.52/4.0

Relevant Coursework: Wireless Communication, Digital Communication, Filter Theory and Applications, Digital Communication Techniques, Embedded Systems, Microprocessor and Micro Controllers I & II, Electronic Circuit Analysis and Design.

Certifications: iBwave Level 1 Certification, iBwave Level 2 Certification, iBwave – In Building Fundamentals

CWNA - Certified Wireless Network Administrator, CWDP - Certified Wireless Design Professional

CWSP - Certified Wireless Security Professional

Technical Skills

Programing Languages	: C++(Advanced), C (Advanced), Python(Intermediate),VHDL
Tools	: MATLAB (Advanced) , COMSOL(Advanced), FEKO, FEM, LABVIEW
Wireless Technologies	: 802.11 a/b/g/n/ac/ah , 802.11 Rogue Device Management, Cisco Aps and WLC,
Networking:	: VLANs, DHCP, DNS, SNAT, STP, RSTP, PVST+, RIPv2, UDP, TCP/ IP, IPv6, IPsec, Sub netting, VTP, VPN, VRF, GRE Tunnels, MPLS, Metro Ethernet, Frame Relay, HSRP, OSPF, EIGRP, EtherChannel.
Distributed Antenna Systems	: Passive Intermodulation, DAS, Implementation of Cell Reuse concept.
Equipment	: Oscilloscope, Spectrum Analyzer, Vector Network Analyzer, Signal Generator, RF Scope
Microprocessors and Microcontrollers	: ATmega 64,ARM (STM32 F4 Discovery, LPC 2148) , Arduino , Rasberry Pi 3
FPGA Boards	: Nexys 4 DDR Artix
Applications	: Microsoft [Word, Excel, PowerPoint] , Adobe, CURA, Visual Basic

Work Experience

Silver Spring Networks, New York | RF Engineer

September 2017-Present

- Working on Advanced Meter Infrastructure (AMI) Project for client Con Edison, New York.
- Performed radio frequency range and coverage testing and optimized mesh network for smart meter deployment in the field.
- Integrated the smart meters on Verizon and AT&T Network and analyzing maintenance log on QuickBase.
- Performed system diagnostics to identify and resolve network problems.
- Proficient in Communication Tester (CATT), Spectrum analyzer, QuickBase and Socket AP.

New York University, Brooklyn | Wireless Project Engineer

June 2017 – Aug 2017

- Project Engineer for Wireless Projects on Seeeduino Cloud MicroController (802.11 b/g/n). Developed projects along with MQTTT Adafruit Cloud Integration followed by data analysis on Excel.
- Instructor for program of Innovation, Entrepreneurship and Science of Smart Cities(ieSOSC), a program led by New York University and National Grid.

New York University | Graduate Research Assistant

Jan 2017-May 2017

- Research assistant on project of Filter application of Toroidal Transformer. Modelled a 2D and 3D prototype on COMSOL using electromagnetic concepts. Low and High Impedance path and Magnetic flux density in the core was successfully determined.

Zaniac, Inc, New York | Electrical Engineering Intern

Sep 2016 – Dec 2016

- Worked as an Instructor for the program of Advanced Robotics. Developed the curriculum and implemented projects for smart city applications. Operated and trained students on 3D Printers (Ultimaker and Elite).

Center for K12 STEM Education, NYU | Summer Instructor

June 2016 – Sept 2016

- Worked as a Summer Instructor for the program, Science of Smart Cities which was an initiative by NYC Department of Education focusing on teaching high school students in the field of STEM. Taught 25 high school students Arduino and Programing as well as various topics such as Urban Infrastructure, Wireless Technology, Energy and Transportation. Helped them in the final Exposition at the end of summer school.

New York City Pain Specialist, New York | Wireless Engineer Intern

Jan 2016 – Sept 2016

- Worked on RF and Wireless devices in medical field including wearable technologies and Radio Frequency Ablation to kill cancer cells. Published articles along with Dr Karan Johan, MD on wearable technologies (802.11). Worked on optimization of frequency application in Spinal Cord Stimulation Technique.

SIEMENS, Mumbai, India| Network Engineer Intern

May 2013 -July 2013

- Worked as an Intern understanding the EPABX systems. Working along with the trouble shooting team, implemented VoWiFi lines with it's integration with Switching Routers HiPath V4 400 and HiCOM 300.
-

Publications:

Jas Sheth, "Wearable Teachnology : From Fitness Tracker to Biotic Limbs" in proceedings of NYCPS, Nov 2016.

Jas Sheth, "Snake and ladder based algorithm for steganographic application of specific streamline bits on prime gap method" proceedings of the IEEE Controls, Instrumentation, Communication and Computational Technologies ICCICCT 2014.

Jas Sheth, " 4 Step Algorithm for Image Compression by Wavelet Transform" poster presentation at IEEE International Advance Computing Conference 2014, ITM University, India.

Leadership Position

- Lead Co Ordinator at NYU STEM Center in organizing and managing events **May 2016- May 2017**
- Event organizer for 'Apparentice' a cultural event organized at VJTI, Mumbai **May 2014 – Aug 2014**
