

Dan Pastar

Summary

Twenty years of nationwide experience in the management of wireless construction, tower erection, site acquisition, job scoping, and wireless architecture and engineering.

Experience includes 4G LTE multi-carrier configurations and development of future 5G Evolution and FirstNet implementations, small cell / DAS / CRAN, and archaic networks such as UMTS, GSM, CDMA, etc. Industry certifications include Andrew Corp., Honeywell, and Wireless Institute. Extensive experience in Ericsson, Nortel, Huawei, Lucent, and Nokia markets. Knowledge possessed also includes sweep, PIM, and fiber/OTDR testing.

Also seasoned in estimating and proposal preparation, crew and contractor scheduling, material and revenue forecasting, purchasing and price negotiating, and soliciting new clients and vendors.

Education

May, 2005-May, 2006 Ivy Tech State College Gary, Indiana

Fire Science

Aug, 1993-May, 1996 Purdue University Hammond, Indiana

Construction Engineering Technology

Professional experience

Jan 2017-Sept 2017 AT&T / Insight Global Lake Mary, Florida
Construction & Engineering Project Manager Level II (Contract Position)

- Hybrid position that cross all disciplines (engineering, construction, site acquisition, scoping, etc) that manages both standard and extremely difficult situations
- Multi-tasked project managing, including: site acquisition, engineering, and scoping for both the North and South Florida Markets for AT&T
- Work with implementation team to troubleshoot and develop solutions during construction phase
- Manage issues in site acquisition phase that have extenuating circumstances (landlord/tenant, jurisdictions, legal, environmental, etc.) that require special attention through negotiation and term modification.
- Work with RAN / RF engineering and scoping teams to determine existing conditions and develop procedures for future growth of 4G LTE, 5G Evolution, and FirstNet

July 2014-December 2016 Orbital Spectrum Technologies Chicago, IL
Operations Manger

- Manage day-to-day operations for a turnkey wireless services company
- Crew scheduling and vendor solicitation
- Review proposals and contracts
- Purchasing

July 2013-June 2014 Ansco & Associates Orlando, Florida

North Florida Market Lead

- Oversee day-to-day operations of the North Florida market
- Manage site acquisition, engineering, and construction.
- Assure that forecast and actualized task completion dates are in sync with client's project management data base.
- Review scoping of sites to assure proper pricing drivers are in place
- Manage vendors to assure that scheduling and quality
- Make and review budgets to assure profitability of the market.
- Conduct regularly scheduled meetings with staff, vendors, and clients
- Recruit new resources (employees and vendors)

June 2012-June 2013 Overland Contracting Minneapolis, MN

Acting Lead Construction Manager (Contract Position)

- Oversee the construction of AT&T 4G LTE and 1st through 4th UMTS Carrier Additions in the Northern Plains (Minneapolis Turf)
- Coordinate activities with contractors and field construction managers
- Develop scope changes and work authorizations with both client and contractors.
- Complete quantity verifications and true-up sites with both client and contractors to complete site construction financial matters.
- Develop solutions to serve the client's need in the most cost effective method without jeopardizing quality and meeting the client's specifications.
- Liaison matters regarding construction activities with landlords
- Schedule site construction and develop "SARC" (Site Acquisition Ready for Construction Packages for contractors
- Complete quality assurance inspections and documentation

Nov 2011-March 2012 US Cellular/Apex Systems Itasca (Chicago), IL

Project Manager (Contract Position)

- Oversaw the replacement of legacy base stations to prepare for the integration of LTE in the Chicago market
- Monitored site audits, bid walks, scheduling and construction
- Reviewed engineering drawings
- Coordinated site access with landlords, prepared change management tickets with network operations
- Coordinated activities to minimize impact of construction activities on property owners and their tenants

Dec 2010-Oct 2011 Baran Telecom Atlanta, Georgia

Project Manager

Central Illinois Market

- Oversaw the construction of +/- 200 2nd and 3rd Carrier UMTS and LTE sites for AT&T/Goodman Networks
- Managed five "in-house" tower crews and six subcontracted crews
- Coordinated scheduling, materials, and logistics
- Worked as liaison between company and clients

Colorado Market

- Turnkey project manager for Lightsquared Broadband project
- Directed site acquisition, engineering, and permitting activities
- Developed and maintained budgets and schedules

- Project placed on hold due to frequency issues

Maine Market

- Turnkey project manager for Northeast Wireless Networks launch of 137 new-build GSM sites across the State of Maine
- Directed site acquisition, engineering, permitting, and construction activities
- Developed and maintained budgets and schedules
- Developed solutions for client's needs
- Procured material vendors and subcontractors
- Project placed on hold due to end-client financing issues

California Market

- Managed the construction of LTE sites for AT&T/Ericsson in the San Francisco Bay Area
- Opened new full service office and warehouse in the San Francisco Bay Area
- Conduct scope of work walks and developed bills of material
- Manage four crews and support staff
- Procured sub-contractors and material vendors
- Prepared work authorization packages, close out packages, and invoices

April, 2010 – December, 2010 General Dynamics Indiana, Michigan & Ohio

Project Construction Manager – Contracted

- Manage construction of over 400 site modifications including adding GSM 850 and UMTS (line/antenna/radio installation), telco and power upgrades, and lease area/shelter upgrades
- Manage contractors, prepare bills of material, scopes of work, scheduling, and permitting
- Conduct field inspections for safety and quality
- Work with engineering firms, make construction feasibility recommendations
- Verify existing site conditions to client records
- Assure that work is completed within approved per-site budget.

October, 2009 – December, 2009 The Intersect Group Indiana & Ohio

Project Construction Manager – Contracted

- Construction management for T-Mobile UMTS upgrade across the State of Indiana and Southwestern Ohio
- Scheduling of construction, coordination with tower owners
- Conduct work quality inspections and prepare punch lists
- Prepare bills of materials
- Conduct pre-construction meetings
- Inspect site preparation for Node B installation and integration including: line and antenna work, telco and electrical, and any additional civil work as needed in Ericsson market

February, 2009 – July, 2009 Great Lakes Telecom Svcs. Cleveland, OH

Construction Project Manager – Independent Consultant

- Construction management for T-Mobile UMTS upgrade in Northern Ohio
- Inspect site preparation for Node B installation line and antenna work and civil construction as needed for Node B/Ericsson integration.
- Coordination of subcontracting to perform line & antenna and civil work
- Work quality inspections and prepare punch lists

November, 2007 – June, 2008 CIC

Northern Indiana

Project Construction Manager – Independent Consultant

- Construction management for new wireless site construction across Northern Indiana for Cricket Communications
- Preparation of bills of materials
- Conducting bid and engineering walks
- Quality control
- Organization of site progress

July, 2007 – October, 2007 NorthStar Washington, DC/Baltimore, MD

Construction Manager - Independent Consultant

- Provided construction management services for UMTS upgrade in the Baltimore / Washington Area for T-Mobile
- Conducted bid and engineering walks
- Prepared bills of material
- Made recommendations for site modification and/or repair as needed

February, 2007-July, 2007 Clear Blue Services

Tempe, Arizona

Independent Consultant – Contractor

- Provided consulting services for wireless construction management and site decommissioning
- Conducted site audits for existing site conditions and recommendations for site expansion as needed

Sept, 2006 – Nov, 2007 Tad Technical Services

Livermore, CA

Construction Manager - Contractor

- Oversaw development of wireless communications facilities, including site acquisition, A&E, zoning, and construction for Cingular Wireless UMTS upgrades managed by General Dynamics in the San Francisco Bay Area
- Performed pre-construction and punch walks with contractors
- Conducted final site acceptance inspections.

Sept, 2002-September, 2006 Great Lakes Telecom Schererville, Indiana

Project Site Development Manger - Contractor

- Oversaw development of wireless communications facilities, including site acquisition, A&E, zoning, and construction in the Midwest for several wireless carriers.
- Performed site walks with engineering firms in preparation of construction drawings
- Bidwalks with potential contractors
- Attended zoning hearings to provide information about projects in order to obtain necessary permitting.
- Solicit new customers and vendors; qualify vendors, as necessary
- Prepare budgets, track project costs

October, 2001-September 2002 9/11/01 Residual Layoff

July, 2001-Oct. 2001 TEK Systems Rolling Meadows, Illinois

Project Engineer (Construction Manager)

- Contracted construction manager to Nextel Communications regional office in Elmhurst, IL hired to oversee system upgrades to Third Generation in the South Chicago Suburbs / Northwest Indiana region. Duties included site pre-planning, vendor solicitation, and bid awarding, punch-list, and as-builts.

Feb., 2001-June, 2001 Site Cellaion Atlanta, Georgia

Construction Manager – Independent Contractor

- Contracted construction manager to Sprint PCS regional office in Rosemont, IL hired to oversee system upgrade to Third Generation in the Midwest region. Duties included site pre-planning, vendor solicitation, bid awarding, punch-list, and as-builts.

May, 2000-Feb., 2001 LCC International, Inc. Pittsburgh, Pennsylvania

Construction Supervisor

- Turnkey construction project management firm specializing in construction of terrestrial repeater network for satellite communications.
- Worked with site acquisition to determine the construction feasibility of sites prior to leasing
- Performed site walks for engineering firms in preparation of construction drawings
- Worked with site acquisition to determine the feasibility of construction at facilities prior to lease negotiations
- Performed bid walks with potential contractors, awarded contracts
- Forecasted materials bill of materials to be supplied by carrier
- Review contractor bids, make recommendations on bid awarding based on proposal inclusions/exclusions, price, and contractor ability

Feb, 1998-May, 2000 ALBS Construction Arlington Heights, Illinois

Program Construction Manager

- Construction management of wireless facilities in the several Midwestern states for numerous carriers.
- Managed and scheduled four tower crews, two civil crews, and two electricians
- Attended pre-construction site walks, completed unannounced site safety visits
- Worked with customers, local authorities, and landowners to rectify unforeseen issues.
- Assisted in development of Architectural and Engineering department within the company
- Review sub-contractor bids, make recommendations on bid awarding based on proposal inclusions/exclusions, price, and contractor ability
- Track project costs

Software/Hardware Knowledge

Mac and PC proficient, Microsoft Office Suite (Word, Excel, PowerPoint, Access), Numerous Customized Databases (FileNet, PACE, SiteHandler, etc)

Certifications / Licenses / Endorsements

Andrew connector, electrical downtilt, and microwave certified, Valid Driver's License (Class D), Valid United States Passport, Firefighter I & II (State of Indiana and International Fire Service Accreditation College), Certified Fire and Explosion Investigator, National Incident Management System certification through the US Department of Homeland Security, Certified Vehicle Fire Investigator, NFPA trained for NFPA 1600 Disaster/Emergency Relief and Business Continuity Auditing and Planning,

Tools

Modern laptop computer, mobile copying, scanning, printing, and faxing (transmit and receive) capabilities, digital camera, Android telephone with current operating system, measuring wheels and tapes, respectable variety of hand tools, full-sized 4X4 SUV with hitch in good condition, global positioning software and tracking, many other tools necessary for on-demand information gathering and distribution while in the field

Civic Activities

GoFishIN Captain with the Indiana Dept. of Natural Resources (teaches youth about fishing skills and good citizenship), former volunteer firefighter, vice president of church board of directors (300 families), youth soccer coach, and high school assistant football coach (1997 Indiana State Champions)
