Seeking employment in a professional environment where I can diversify and improve upon the skills gained during my ten years as an Network & Telecommunications Engineering. As the Construction Manager & Video Quality Auditor, I would focus on enhancing the company's productivity and reputation while improving my own.

Willing to relocate: Anywhere

Authorized to work in the US for any employer

Work Experience

Video Quality Auditor & Construction Manager

MasTec Network Solutions - Carolina, PR

July 2015 to Present

- Serving as jobsite representative for the carrier
- Assisting in the identification and qualification of the various sub-contractors required for the project, including all site and building trades
- Providing coordination and input as needed with utility companies providing services and infrastructure for the project, including schedule and cost management
- Monitoring and ensuring schedule performance and quality workmanship of contractors
- Reviewing potential subcontractor's safety policies, procedures, and performance during the pre-qualification/bidding phase to ensure the company meet the established requirement
- Reviewing / auditing daily activity conducted by subcontractor personnel
- Conducting accident investigations and incident reports as needed
- Taking immediate corrective action on any unsafe acts observed, involving the company management and subcontractor management for immediate review
- Conducting field-monitoring activities associated with hot work permitting, excavation permits, crane operation, equipment loading/unloading, etc.
- Reviewing change proposals, proposal requests, requests for information, supplemental instructions, and other contract documentation as required on behalf of the carrier's interests
- Working closely with the contractor, and associated consultants in developing site specific value engineering options for the work
- Ensuring the optimal operation of the elements that support the network: tower, rooftop, monopole sector, and installation of radios, antennas and fiber, power trunk
- Visit the sites to complete the Pre construction walk and then inspect them on the ND502
- Knowledgeable in the use of QMS, N-Site and Share Drive
- Serving as an information resource by coordinating tenant's work, participating in meetings, resolving disputes, providing ongoing feedback, and coordinating project punch list and close-out.
- Knowledge of different technologies (AWS, GSM, UMTS and LTE).

Telecommunications Engineering

Dynamic Tower Services - Carolina, PR

October 2013 to July 2015

Independent Contractor

BTS Field Network Integration Engineer

- Integrator Ericsson Alarm AT&T
- Troubleshoot to ensure component quality
- Perform alarm commissioning on Ericsson RBS series AT&T
- Perform integration for RBS series 3G/2G external alarm Umts (2nd carrier and 3rd carrier).
- Perform emergency duty or any other duty as may be required by the network integration OSS or Project Manager.

AT&T Quality Standards

- Tower Site Audit Checklist
- Tower, Equipment Shelter and Site.
- Provide one digital photo of tower site, shelter exterior, shelter interior and tower, provide a detailed site audit report, which include all of above mentioned items.

JDSU Fiber Optic Test and Inspection

- Full range of fiber inspection and cleaning solutions for LTE

Anritsu Certified

- PIM\ Line Sweep

UMTS Field Tech/Engr T-Mobile

- Performed Nokia-Flexi 2G/3G multi radio BTS, Nokia Flexi-WCDMA BTS and LTE equipment Commissioning, Integration and troubleshooting for T-Mobile.
- Performed RF Optimization field support doing Remote Electrical Tilts (RETs) on both GSM, WCDMA & Antennas/LTE.

Electronics Technician III

Ingram Macro - Humacao, PR

October 2007 to March 2013

Responsibilities

- Inspect products to verify conformance to specifications.
- Recommend changes to improve process methods, equipment performance and quality of product.
- Accurately document repair codes and parts information on certain repair documents and in computer tracking system.
- Reading and translating of repair documents.
- Performs routine inspection testing, programming, troubleshooting and functions with or without direct supervision.
- Develop and maintain excellent working relationships with peers and supervisors within the department with occasional interface with management for information exchange.

Accomplishments

Lay out, build, test, troubleshoot, repair, and modify developmental and production electronic components, parts, equipment, and systems, such as computer equipment, test equipment, and

machine tool numerical controls, applying principles and theories of electronics, electrical circuitry, engineering mathematics, electronic and electrical testing, and physics.

Education

Master of Engineering in Computer Engineering in Internet Engineering

Polytechnic University of Puerto Rico - Hato Rey, PR
November 2016 to October 2018

AS in Biomedical Equipment Repair

Mech Tech College - Caguas, PR
2010 to 2011

B.S. in Electronic Engineering Technology

Remington College - Tampa, FL
2001 to 2003

A.S. in Electronic & Computer Engineering

Remington College - Tampa, FL
1999 to 2001

Skills

Information Security and Assurance, Networks Security, Microsoft Data Base Administration, Cisco CCNA, Quality Control, Tower Closed Out & Audit, Sweep Line Test, PIM Test, JDSU Fiber Optic test and Inspection, Auditing

Awards

Employee of the Month

February 2017

In recognition of your dedication, passion and hard work

Certifications/Licenses

Anritsu Sweep Line Test

February 2014 to Present

Cellular system performance starts with correct line sweep measurements. This acceptance test is usually broken down into two basic tests: Return loss and insertion loss. Both are very frequency dependent and can vary greatly within a specified band.

Anritsu PIM Test

February 2014 to Present

PIM issues may occur as existing equipment ages, when co-locating new carriers, or when installing new equipment. PIM is a particular issue when overlaying (diplexing) new carriers into old antenna runs.

MDC Cisco Network Associate

July 2006 to Present

Install, configure, and support an organization's local area network (LAN), wide area network (WAN), and Internet system or a segment of a network system. Maintain network hardware and software. Monitor network to ensure network availability to all system users and perform necessary maintenance to support network availability. May supervise other network support and client server specialists and plan, coordinate, and implement network security measures.

MDC Microsoft Database Administrations

July 2007 to Present

Responsible for database integrity, security, disaster recovery, and performance tuning; develops and enforces database administration and user standards and procedures; audits, modifies, and amends data in systems using SQL commands, hand-editing, and bulk import; oversees the scheduling of database projects, database and transaction log backups, notifications, and database replication between multiple SQL Servers and remote sites; assists developers in creating stored procedures and SQL commands to properly query databases; Fluent in backup/restore and log shipping procedures; Creates documentation on database recovery and architecture.

ComTrain

September 2016 to September 2018

Tower Climbing & Rescue
Competent Rigging

Information Security and Assurance

December 2017 to Present

Identify threats that could affect information and data assets, learn the principles, standards, and legal and ethical aspects related to virtual security, apply laws, procedures and regulations, among other legal aspects, and manage information security for all operational phases of a business.

IA is the practice of assuring information and managing risks related to the use, processing, storage, and transmission of information or data and the systems and processes used for those purposes.
