

PROFESSIONAL SUMMARY

- Astute professional with six years of progressive experience in Telecommunication and Operational Support System (OSS) covering 3G, LTE, VoLTE network optimization, FIT, designing, and RAN database analytics.
- Extensive multivendor (Samsung, Nokia, Ericsson, ALU and Airspan) interaction and working experience.
- Hands on multi OEM tools, Network and Databases optimization experience in major markets across USA.
- Experience with LTE multiband traffic management, LTE-Adv features (Carrier Aggregation, Beamforming, Load balancing), VoLTE and Massive MIMO configuration and KPIs scripting.
- Strong aptitude towards learning new vendor technologies and features.

COMPUTER EXPERIENCE

- **RF Tools:** PRTS, EDAT, QCAT, MapInfo, Nemo Wind catcher, BSM, SNAP Tableau, Leap, Reveal, RF Cockpit, CDMA Health Index, Siterra, Mentum Planet, Atoll, XCAL, QXDM, JDSU
- **OEM Tools:** NPO, SAM, WPS, LSM, ProComm Plus(OMP)
- **Databases:** Hadoop, Teradata, Netezza, IBM Sailfish, SQL Server Management Studio, Service Assurance, Splunk
- **Others:** Microsoft Office (Power point, Excel, Word, Outlook, One note, Notepad ++), SQL

WORK EXPERIENCE

RF OSS Performance Engineer- RAN National Team | Sprint **Overland Park, KS**

Nov 2016- Current

- Lead role in creating Massive MIMO, VoLTE, Carrier aggregation, and Beamforming audits for National and RF teams nationwide in Sprint performance tools.
- Review and create requirements for new and modified multi-vendor releases of Network Performance measurements and parameters for various performance tools.
- Perform RAN data testing for performance metrics on various platforms including different databases, BI reports and Tableau reports using SQL Teradata, Hadoop and Netezza.
- Extensive experience in upgrading multivendor RAN Oms, KPIs and parameters new releases for Samsung, Lucent, Nokia, Ericsson and Airspan in databases.
- Integrate the process of data validation & testing from vendor requirements to development and production.
- Provide solutions to the enhancement of existing network and systems to improve and optimize user experience.

RF Engineer II at Nokia Networks (Sprint Consultant) **New York, NY**

Oct 2014 - June 2016

- Responsible for optimizing 13 clusters (~ 700 sites including LTE FDD 1900/800 MHz, ALU TDD 2.5 GHz Design II & Samsung TDD 2.5 GHz Design I).
- Lead for Root Metrics preparation team; prepare test plans to improve Voice CFR, Voice CDR, LTE CFR, LTE CDR, UL RSSI, Throughput, RSRP and capacity.
- Performed live network monitoring and LTE Traffic balancing between sites during special events in stadiums.
- Analyzed markets to improve coverage and interference, Inter/Intra hand-off during VoLTE launch readiness project.
- Perform Pre and Post Launch optimization, multicarrier translations, parameters/tilt audits, missing Neighbors check, PN Conflict, PCI Collision etc. for new LTE and CDMA Macro, DAS and Mini Macros.
- Create and implement work orders and scripts for different LTE and LTE-A parameters using tools such as WPS, SAMB and LSM at cluster and market level.

RF Engineer at Alcatel Lucent (FIT Team)**Dec 2013 - Oct 2014****Dallas, TX**

- Responsible for FIT traffic management trails for LTE FDD and TDD bands using in Idle/connected Mode.
- Co-ordinate with manager and team lead during planning, execution and closing phases of projects.
- Prepared and present trial reports to customer in weekly meetings.
- Analyzed QXDM/JDSU based drive test logs using EDAT and wind catcher and troubleshoot problems like CDMA drop calls, LTE Intra/Inter Handoffs failures, and LTE RRC drops using layer 3 messages.
- Identify and troubleshoot top offenders in terms of CDR, CFR, Throughput, SINR and Capacity Issues using NPO, PRTS and Tableau.
- Perform alarm sweep, tilt and parameter audits before and after each traffic management trail.
- Propose and create cluster drive routes according to the site locations for trials using MapInfo.

Customer Experience Coordinator at TJX Companies, Inc.**Mar 2009 - Nov 2013****Dallas, TX**

- Troubleshoot technical issues like hardware, software and networking relating to registers functionality.
- Coordinated with managers to supervise and train new hires on customer service standards.
- Resolved customer complaints promptly in a manner that will retain and promote customer's loyalty.
- Audited and approved all necessary front line paperwork and procedures.
- Compiled reports on sales and overall customer satisfaction.

Teacher Assistant Intern at the University of Texas at Dallas**Aug 2012 - Dec 2012****Dallas, TX****EDUCATION****University of Texas at Dallas Richardson, TX****- May 2013**

- Bachelor of Science in Electrical Engineering
