

Mark Mack

3139 Birchleaf Dr., Katy, TX 77449 • 850-454-8717 • mackm26@yahoo.com

ENGINEER

Accomplished and dedicated Electrical Engineer with 10+ years of experience in telecommunications and corporate domains. Versed in versatile equipment maintenance, security software, and testing. Possesses strong knowledge of security measures, troubleshooting skills, leadership attributes, flexibility and high level of cultural awareness. Utilizes strong communication abilities to deliver outstanding customer solutions and achieve business objectives.

CORE COMPETENCIES

- | | | |
|--|-----------------------------------|--------------------------------|
| • Telecommunications, Network & Electrical Engineering | • Training & Development of Staff | • Research & Analytical Skills |
| • Equipment Maintenance | • Test Development Engineering | • Budgeting & Reporting |
| • Excellent Communication Skills | • Software Development | • Project Management |
| | • Interpersonal Skills | • Driving License |
-

RELEVANT EXPERIENCE

Ervin Cable Construction, Houston, TX

2019 – Present

Engineering Design Supervisor, ODN Lead

- Managed processes effectively and apply expertise to ensure completion of work assignments.
- Participated in the implementation and maintenance of processes or procedures.
- Communicated with employees, contractors, vendors, and/or customers to assist assigned department/project.
- Troubleshooted issues in real time by diagnosing, repairing, replacing and/or upgrading components.

AT&T, Houston, TX

Field Technician

2015 – 2019

- Design OSP and ISP engineering for residential and business locations, including educating clientele in person on unique service features and functions.
- Oversee installations by evaluating the location, locating access, laying-out equipment, and wiring plan.
- Obtain competency in a right-of-way, property rights, and permit requisition.
- Troubleshoot issues in real time by diagnosing, repairing, replacing and/or upgrading components.

AkerSolutions / Mhwirth, Houston, TX

Electrical Instrumentation/Controls Instructor

2014 – 2015

- Provided training to drillers and assistant drillers to use Siemens Step 7 PLC and controls systems network and devices safely and properly; provided simulator training to demonstrate a realistic drilling experience.
- Created a variety of procedures to test control systems as well as a data network to each machine, which consisted of numerous analog and digital sensors.
- Performed the installation of electrical and instrument cable tray and ladders; specified instrumentation and electrical equipment.

Oceaneering International, Morgan City, LA

Senior Electronic ROV Technician

2012 – 2014

- Diagnosed and repaired electronic and electrical systems and sub-systems associated with remotely operated vehicles (ROVs), including component repair, replacement, and troubleshooting.
- Delivered technical expertise to the team that redeveloped NASA Constellation Space Suit.
- Smoothly operated a Remotely Operated Vehicle (ROV) to provide support to oil rigs.

Independent Contractor, Lady Lake, FL

IT Consultant

2008 – 2012

- Developed, installed and supported data and sub-autonomous surveillance networks, including six pan and tilt network cameras and motion detectors that used face recognition software.
- Configured VPNs/VoIP networks to design wide area networks (WANs) and local area networks (LANs), and configured IDS and Network firewalls.

Restor Telecom Inc., Leesburg, FL

R&D Test Development Engineer

2006 – 2008

- Introduced automated and manual test systems for a wide variety of telecommunication circuit packs.
- Developed schematics and electrical designs specifications; created circuit designs and PCB layouts; designed prototypes, and wrote test procedures.
- Modified a new power supply for a customer, which was capable of taking 48 volts DC and outputting 5 volts DC at 5 amps; +12 volts and -12 volts DC at 5 amps; and +5 volts DC at 10 amps.

Baskerville and Donovan Inc., Pensacola, FL

Mar 2005 – Aug 2005

Electrical Engineer

- Assisted in design of power distribution systems, control systems, electrical site plans, control panels and lighting diagrams for wastewater treatment plants, and roadways.
- Delivered single-line diagrams and electrical designs specifications; designed bill of materials for electrical and structural designs; and analyzed relay control panels and SCADA systems for anomalies.
- Instructed customers on reducing waste, and improving processes by programming PLCs via HMI software.

OTHER EXPERIENCE

Pensacola State College, Pensacola, FL

Adjunct Professor

2010 – 2012

- Taught a course in Introduction to Computers and Technology, which covered the basic concepts of computer hardware and components; operating systems software; application software; networks; and the Internet leading to IC3 Certification.

General Electric, Pensacola, FL

Assembly Technician

2005 – 2006

- Conducted post-tests, including leading the generator bedplates assembly process.
- Wired control panels, installing PLCs, encoders, top boxes, and yaw motors, and participated in testing of wind-driven turbines.

EDUCATION

Master of Science in Telecommunication Networks, Polytechnic Institute of NYU; New York, NY, 2012. Certificate in Wireless Communication.

Bachelor of Science in Computer and Electrical Engineering, University of Florida; Gainesville, FL, 2004.

Associate of Science in Civil Engineering, Pensacola State College; Pensacola, FL, 1999.
