Seeking Position As:

RF Engineer

Enthusiastic, determined and motivated engineering professional seeking to contribute training and acquired skills in a challenging RF-related position encompassing computer operations and support, installations, troubleshooting, and maintenance. Proficient in computer hardware, software and other peripherals with updated knowledge in current technologies in networks and telecommunications, equipment and other cutting-edge applications. Hands-on experience in installation, configuration, and troubleshooting of applicable software and hardware. Excellent problem-solving and communication skills with ability to work well independently or as part of a group within highly technical and fast-paced environments.

- Information Technology
- RF frequency Principles
- Installation, Repair & Maintenance
- Network & Systems Security
- Personal Computer Hardware
- Testing & Quality Assurance

Professional Experience

SAI Communications

Sept 2018 – May 2019

RF Engineer

Norristown, PA

- RF propagation principles, RF engineering tools and optimization
- Supporting/Maintaining in the development of DAS engineering procedures & applications - JMA Teko, SOLiD, CommScope & Corning
- IBWAVE Certified Level 1
- CRAN builds, Small Cell builds (Airscale/FSM4 5G rollout)
- Support and conduct RF baseline testing utilizing RF scanners and phones to collect existing network performance data.
- Primary customer interface of engineering level for DAS projects.

AT&T Mobility

April 2014 – June 2018

Senior Specialist - RAN Engineer+

King of Prussia, PA

- RF principles, maintenance & cellular theory. Frequency planning/coordination. Monitoring Performance trend and Isolation resolution. (ATOLL / Mapinfo)
- Monitor KPI's for selected cellular sites in the PA, NJ & DE areas. Coordinated filings with & established relationships with FCC field offices.
- Analyze, optimize & troubleshoot network issues (Rhode & Schwartz spectrum analyzers, JDSU tools & TEMS devices.) PIM recognition, testing & vendor assignment
- Interference hunting. Identify external interfering sources within designated UMTS, PCS, LTE, WCS & AWS uplink bands. Troubleshoot RSSI / RTWP issues.
- Troubleshoot DAS & small femto cell performance issues. Walk test sites with TEMS/Falcon One devices. Actix data processing.
- Troubleshooting issues via PUTTY SSH client, Alcatel Lucent SAM/NEM platforms & Nokia NetAct.
- RFME and Regional PMC Technical support. Monitoring performance trends and Isolation resolution, analyzing data and creating coverage solutions.

Ericsson

Field Technician
Pennsauken, NJ

April 2011 - March 2014

- Installed, maintained & repaired Lucent CDMA equipment in 4.0, 4.0B, Legacy & compact cells for Sprint.
- Installation, maintenance & repair of Motorola iDEN equipment for Nextel Communications.
- Trained in T1 installation & troubleshooting / Acterna 107A T-berd / FLUKE 635 Quickbert
- Trained in Anritsu S331D Site Master & Cell Master operation for antenna sweeps & power reflection.
- Completed RF theory training/ BDA in-building cell solutions training
- Completed courses from Alcatel Lucent University on LTE/ Network Vision deployment
- Proficient in 5E Switch & Lucent cellular BTS access via ProComm Plus/PuTTY
- Participated in several major disaster recovery situations. Reconnaissance & triage of cellular outages

Verizon Communications

Service Technician
Aston, PA

Nov 2006 – Dec 2010

- Installed all copper and fiber optic facilities servicing both commercial and residential properties while ensuring accuracy and timely in conjunction with standard business and application practices.
- Trained in copper splicing with 3M's 710 splicing machine.
- Trained in Fiber splicing with Sumitomo fiber fusion splicing machines type 25M and 9M
- Maintained proprietary records for copper and fiber optic terminals and interfaces.
- Installed and maintained all Plenum Ethernet CAT5E and Coaxial RG6 cables for all data and video applications.
- Performed maintenance and reporting to Verizon proprietary computer system IVAPP Provided all technical support for all data connectivity issues and end user problems.
- Knowledge of the telecom standard color code.

Relevant Experience

United States Marine Corps

Ammunition Technician (MOS 2311)
Camp Pendleton, CA

Nov 2004 – Aug 2006

- Stationed in Camp Pendleton, California
- Trained in Urban combat, Mountain Warfare & Life Survival skills
- Deployed to Kuwait & Iraq - Dec. 2005 through Aug. 2006
- Honorably Discharged in Aug. 2006
- Received USMC honors with a Meritorious Mast promotion

EDUCATION & TECHNICAL SKILLS

Pennsylvania State University

Associate Degree Major in Information Sciences and Technology May 2003
