Career Statement

Offering proven experience and competency in the PCS and Cellular Industry (TDMA, 3GPP, GSM, LTE, 5G, VOLTE & UMTS Technologies) DAS SMC testing and Data analysis with Wireshark and Windcatcher analysis tools. Spectrum Analyzer, JDSU, and TEMS Investigation Testing Tools

Employment Experience

Sr. RF Field Engineer

FEB. 2019-Present

Netscout

- Data Collection of LTE & 5G Networks
- Performed Test on defined cell sites using Spectrum Analyzer and JDSU Scanner devices
- Setup Omni Ant on Roofs, Towers and Lifts(Small-Cell) for continuous wave(CW) for pathloss test
- Used Microsoft GPS and Applanix for accurate test measurements
- Multiple Bands tested(700,800,2100,2500) & Transmitters(TX) - 5 and 10 watts
- Lead a team of six crew members for successful and accurate test completion
- Analyzed/Processed data for LTE root KPI issues (RSRP,RSRQ,SINR)

Lead RF Field Engineer

Sept. 2018-Jan 2019

Teksystems

- Data Collection of UMTS, LTE, VOLTE Networks for Pinebelt Wireless
- Performed Test on defined cell sites using 8UE devices
- Verify Max Throughput by using TEMS 20.2
- Perform Handover test, CSFB, LTE DL & UL, EVDO DL and PING test
- Created drive routes for baseline test via Street Atlas
- Analyzed data with Windcatcher for LTE root KPI issues (RSRP,RSRQ,SINR)

DAS/SMC Engineer (NC, SC,TN)

Apr 2017-Aug 2018

Verizon/ARQ

- Data Collection of WCDMA, LTE Networks, Band Test - 600,700,850,1700,1900,2100
- Performed Test on small cell and distributed antenna systems: TCP/UDP IP Protocol
- Verify Max Throughput by using XCAL-Mobile D-MAT and Seehawk software (PcTel Scanner)
- Perform Handover test from SMC to Macro Cell Tower and stationary test for Small Cell

Associate RF Engineer (Birmingham, AL)

Oct 2016-Jan17

T-Mobile

- Data Collection of UMTS, GSM, LTE
- Performed Single Site Verification (SSV), Voice recognition
- Used TEMS Investigation 17/Airview 3.0
- Trained new employees on SSV

RF Drive Test Engineer (Birmingham, AL)

Sep 2015-Mar16

LCC

- Data Collection of UMTS, GSM, LTE, & EVDO,3GPP
- Used XCAL for data collection and to identify areas with interference and poor coverage.
- Used Iperf Script, FTP, Windcatcher, TEMS15
- Performed IVHO, LTE, 800/1900mhz Cluster, 2.5mhz Test
- Proficient in 4G, CLA, Cluster, 4G Post Cluster, & 4G Pre Cluster Drives,SSD,SSV
- Baseline test, RSRP, RSRQ, SINR, PCTel Scanner
- Monitored DL/UL throughput and Rx/Tx Power DAS/small cell testing
- Trained new employees on XCAL.
- Used street atlas, road maps, and GPS to collect data.
- ATT SiriusXM site testing/ RSL calculator/Ericsson eNodeB and OSS
- Conducted SSD testing for DL UL and PING

Drive Test Engineer (Detroit, MI)

Jan 2013-Aug 2015

Samsung/Sprint

- Data Collection of UMTS, GSM, LTE, & EVDO
- Used XCAL for data collection and to identify areas with interference and poor coverage.
- Used Iperf Script, QPST, Test Bands - 800,1900,2100,850,1700
- Performed IVHO, LTE, E911, ATP, & CTTTP's Test
- Proficient in 3G, CLA, Cluster, 3G Post Cluster, & 3G Pre Cluster Drives.
- Able to perform PRL updates/VoLTE Optimization
- Trained new employees on XCAL.
- Used street atlas, road maps, and GPS to collect data./ Map Info

Drive Test Engineer (Gulfport, MS)

Nov 2011-Dec 2012

Cell South/3G1X

- Data Collection of UMTS & GSM Networks
- Used QXDM for data collection and to identify areas with interference and poor coverage; performed a series of test at the direction of the RF Engineers, coordinated with them to assure that we were receiving the maximum throughput. Testing eNodeB and OSS
- Trained new employees on QXDM
- Operate WINDS (VL, VS); (DL, UL)
- Used street atlas, road maps, and GPS to collect data.
- EVDO/PING

June 11-Oct 11

T-Mobile Wireless/3G & 4G

- Data Collection of UMTS & GSM Networks
- Used TEMS 12.0 for data collection and to identify areas with interference and poor coverage; performed a series of test at the direction of the RF Engineers, coordinated with them to assure that we were receiving the maximum throughput.
- Trained new employees on TEMS 12.0
- E911 calls (Expert), Actix One.
- Used street atlas, road maps, and GPS to collect data.

Drive Test Engineer (Dallas, TX/ New Orleans, LA)

March 2007-June 2011

Global Wireless Solutions

- Data Collection of UMTS & GSM Networks
 - Used Swiss Qual for data collection and to identify areas with interference and poor coverage performed a series of test at the direction of the Engineers, coordinated with them to assure that we were receiving the maximum throughput. Had them change parameters and relayed the impact of the change to guys in the office.
- GPS Field Testing
- Trained new employees on Swiss Qual, Speech and Voice recognition during test. Embedded systems

Software/Equipment Used

Proficient in using the following types of software/equipment:

TEMS Investigation, Agilent, TEMS Optimization, Pocket TEMS, Scanners, ATOLL, Swiss Qual, Spectrum Analyzer, Wiltron Sweep Test Anl. Hp Analyzers, "Knowledge of cellular technologies"(GSM, UMTS), HSDPA & GPRS Upload/Download, FTP server, SAFCO, Microsoft Excel 2018, Microsoft Word 2018, Access 2018, Windows XP Professional, Windows 12, Import/Export unit, Benchmarking, punch down, cat 5,6,12 cabling, Streets and Trips 2018, PCTEL MX Scanner, RF Antennas, XCAL (ALL VERSIONS) Python, VOLTE Calls, OEM(Alcatel,Ericsson,Nokia,nortel,Lucent,Samsung) . IQxel-M(modem testing) , MIMO,KPI(LTE) analysis,

Education

University of North Alabama

- *Sports Medicine*
- *Computer Technology*

Miles College

- *Computer Information Sciences(B.S.) - Graduated Apr. 2019*
