Profile

- Dedicated professional for more than 15 years in telecommunication industries with significant experience in implementation, installation, manage, supervise, testing and troubleshooting.
- Highly flexible, adaptable to multitask, quickly to learn and incorporate new concepts.
- Available for Traveling National or International.
- Interested in the technologies and their advances.
- Effective verbal and written communication skills.
- Reliable team player with enthusiastic attitude and strive at building good customer satisfaction customers and relationship with colleagues.
- Extensive knowledge with IP, AXE810, APG43, APG43L, Baseband SERIES 5216 and 6630, AoIP, GboIP ,NWL,SMX, EVOBSC8200, EVOBSC8230,IP, WCDMA (3G), LTE.

Education

Electrical Engineer, Accion Pro-Educacion y Cultura University (UNAPEC), Sto. Dgo., Dominican Republic - 1994

Master's in management and Productivity, Accion Pro-Educacion y Cultura University (UNAPEC) university, Sto. Dgo., Dominican Republic. – 2002

Technical Education:

CCNA routing and switching, ITLA (module 1, 2 and 3)

WCDMA, System Overview, Operation and configuration, Ericsson Costa Rica.

LTE, System Overview, Web learning.

LTE, Air Interface, Ericsson Brazil, via Centra

LTE, L12 Protocols and procedures, Ericsson Brazil, Via Centra.

GSM SYSTEM SURVEY, Certificate by Ericsson Education Center of Mexico, Ericsson BDO.

GSM RBS 2106/2206 site maintenance, Certificate by Ericsson Education Center of Brazil, ERICSSON BDO

GSM BSS integration, Certificate by Ericsson Education Center of Brazil, Ericsson BDO

GSM BSC Operation, Ericsson Education Center, Plano Texas.

GSM BSC Maintenance, Ericsson Education Center, Plano Texas.

GSM AXE 810 Operations and Maintenance, Certificated by Ericsson Education Center of Brazil, ERICSSON BDO.

APG43L, Ericsson Brazil, via Centra

APG 40 Operations and Maintenance, Certificate by Ericsson Education Center of Brazil, ERICSSON BDO.

BSC EVO8200 Ericsson Sweden, Workshop

BSC EVO (8100 and 8200), OJT Ericsson Brazil, Implementation done in Haiti

Management/Supervision

- RF engineer for 3G, 4G and GSM
- Acting LM of Build during year 2017
- Team Leader of Competence Domain of Ericsson RAN for Central America, Caribbean and Venezuela
- Coordinate supervision and installations of Ericsson RBS 2000 family.
- Commissioning and Integration of Ericsson RBS 2000 series equipment.
- Coordinate and monitor works made in GSM telecommunications site (civil works, electrical works, telecommunications tower and telecommunications equipment, feeder installation).
- Elaborate official documents: norms, specifications and internal rules for the construction of ours sites.

Relevant Experience & Accomplishments

- BSCEVO 8230 implementation in ETECSA Cuba
- Perform integration of the Viva Network deployment WCDMA, LTE, GSM and Baseband.
- Integration of Baseband 5216, 6630 in GSM+WCDMA and LTE
- Perform O&M for WCDMA, GSM and LTE Viva Project
- First Implementation of BSCEVO8100 in Latin American region
- Design BSC EVO8200.
- Integration and configuration of BSC for MSC in pool; Digicel Haiti
- Upgrade from 08A to G10B Digicel Haiti
- BSC rehomming to new SGSN, Claro Dominicana
- E911 Implementation at Claro Dominicana
- GB over Ip implementation and configuration, Digicel Network of Jamaica
- RPMO activation for BSC, Digicel Jamaica
- Migration from A over TDM to A over IP Digicel Haiti
- Implementation of Abis over IP Digicel Haiti
- Configuration and integration 4 BSC EVO8200, Milicom Honduras.
- LanSwitch upgrades to all network, Orange Dominicana
- Ciphering implementation and configuration, Orange Dominicana
- Change of BSC from BSC stand alone to BSC/TRC
- GSM Rehomming

Employment

Ericsson BDO
RF Engineer 4G, 3G and GSM
NMSD CU LAM North & Car OPT CA & CAR

*February 2019 –
June 2020*

Collect and analyze KPI's network in order to improve the behavior and performance. Perform radio design to maximize the potentials of the network.

Ericsson BDO
Senior Service Engineer
CD RAN Team leader

*December 2009-
February 2019*

Job description: Perform RAN project assigned task according to Ericsson customer in RLAM region. It means: Implementation, development and integration of new technologies and nodes 2G, WCDMA and LTE. Also update and upgrade of existing network to change release.

As Team Leader, I am in charge of the team based in Central America, Caribbean and Venezuela. I am responsible for administrator, evaluation, managed, technical support and follow the behavior and competence development for the team.

Huawei Technologies
Wireless senior Engineer

*September 2009 –
November 2009*

Job description: Perform operation, Maintenance and integration of Node B, supervise Node B implementation. Usual O&M of RNC

Digicel Haiti
BSS Senior Engineer

*August 2008 -
2009*

Job description: Perform O&M of digicel network including the APG tracking and perform all required task in the implementation, integration and dimensioning of new sites and expansion to improve RAN (Radio Access Network). It means: Perform daily and monthly O&M task of RAN nodes (BSC), support field engineer to solve RBS node issues, Implement IPA and new release on BSC, perform rehomeing between BSC's to improve network behavior.

Orange Dominicana, S.A , Sto.Dgo
BSS Senior Engineer

2004- July 2008

Job description: tracking and perform all required task in the implementation, integration and dimensioning of new sites and expansion to improve RAN (Radio Access Network). It means: O&M of RAN nodes (BSC), support field engineer to solve RBS node issues, rehomeing of cells sites from one BSc to another, Dimensioning of BSC nodes in order to get the proper expansion to maintain the network standards.

Orange Dominicana, S. A, Sto.Dgo
BTS – Integration and Field Engineer

Job description: tracking all required stages in the construction of new sites and future expansion and improvement modifications for RAN (Radio Access Network) Systems and transmission link locations. It means: selection of new locations, to propose and to validate the design of civil and electrical tasks, to acquire documentation and authorization from internal departments involved (RAN, Transmission, Power, Legal, Security), verification of budget estimation, to follow the quality control in the construction tasks (agree with ODO specifications) and according to the scheduled plan, site acceptance and final budget approval. In addition, make analysis and decisions aspects related to CAPEX and OPEX budgets, technical specifications requested for price (RFP) process, contracted contractors and selection of new ones, equipment providers and service supports, as well as the company quality service.

Skills

- Knowledge in GSM Systems.
- 3G Knowledge
- LTE Knowledge
- Baseband Troubleshooting
- Knowledge RF GSM, WCDMA and LTE
- AXE tester for Mobile Networks.
- Installation Supervise
- Site Survey.
- Data Transcript GSM Network Nodes
- Project Management
- Knowledge of RF tests Software.
-

Languages

- English: Fluent.
- Spanish: Mother Tongue.
